## Wasp Control

Wasps pose a severe risk to many homeowners, especially in Texas. It's bad enough to have a large group of wasps flying around your home for hours on end, but the situation grows even more alarming when you include those within the home with

serious allergic reactions to their stings. Wasp stings can develop into a serious infection or a visit to the hospital.

## Fly Control

Did you know that there are thousands of different species of flies? Whether it's a House, Phorid, Drain or Fruit fly, the key in eliminating the problem is correctly identifying the fly. Let Combat Pest Control be here to assist you. After correctly identifying your pest, we can show you how to effectively control the problem. We will look for the issues that support their survival and address these with you. We can

customize a fly control program unique to your home/business' specific needs.

Remember, if you are unsure of any insect, please contact one of our offices to speak with a trained pest control professional.

## **Bird Control**

Most birds are seen as beautiful to look at, and many are beneficial in eating mosquitoes and other harmful insects. However, birds can often become nuisances.

Most birds have very acidic droppings which can deface marble, limestone,

painted surface, statues, car finishes, etc. Fresh droppings can cause objectionable odors and slippery surfaces on sidewalks, roads, fire escapes and other areas. Nests can block air vents or present fire hazards. Parasites like mites, fleas, and ticks can be carried by birds which can affect the health of your family members, employees or customers.

Combat Pest Control can provide the appropriate products which will discourage birds from unwanted locations, or if necessary, can be trapped and relocated to a more suitable area.
